Daniel Fausto Franco

Software Developer, Full-Stack (TypeScript) | POS & Kiosk Systems

Merida, Yucatan, Mexico | ib.daniel.fausto@gmail.com | +52 998 135 3146
LinkedIn: https://www.linkedin.com/in/daniel-fausto-franco/ | GitHub: https://github.com/daniel-fausto | Portfolio: https://daniel-fausto.vercel.app/

PROFESSIONAL SUMMARY

Software Developer with 7+ years of experience developing and supporting scalable solutions for POS systems, kitchen management tools and dashboards. Proficient in React, TypeScript, Angular, Vue.js, Node.js, SQL and Python, with experience integrating payment systems and applying automated testing with Jest and Playwright. Recent experience with AI (OpenAI, Gemini) and OCR. Engineering background (firmware, electronics, robotics) brings strong end-to-end systems thinking. Focused on code quality, clean architecture and continuous improvement.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Python, C++, C#, SQL

Frontend: React, Angular (v15-v20), Vue 3, Next.js, RxJS, NgRx, Redux Toolkit, HTML5, CSS3/SASS, TailwindCSS, Bootstrap, Material-UI, Recharts, ag-grid

Backend: Node.js, Express, Flask, REST APIs, MongoDB, SQLite, MySQL, PostgreSQL, Sequelize

Cross-platform: Electron, Cordova, peripherals (printers, scanners, cash drawers), Socket.IO, SignalR

Applied AI: OpenAI API, Google Gemini, OCR (Tesseract.js)

Testing: Jest, Playwright, Protractor, Cypress, Mocha, Karma/Jasmine

DevOps/Tooling: Git, GitLab, Docker, CI/CD, Webpack, Vite, Jira, Slack

Methodologies: SOLID, Clean Architecture, Agile / Scrum

Hardware (plus): C/C++ firmware, ROS, PCB, microcontrollers (ESP32, PSoC, PIC, ATmega, Raspberry Pi)

WORK EXPERIENCE

Software Developer - GA Tech (assigned to Xenial / Global Payments)
Feb 2023 - Present | Remote
Platform used by: Burger King, Denny's, SeaWorld, Carrefour, H&M, Volkswagen, Royal Caribbean, Ironman

- Development and support of the Genius POS and XKM (Kitchen Management) systems by Xenial/Global Payments, used by global chains across restaurants, retail, automotive, cruises and events.
- Stack: Angular 20 + TypeScript + SQLite (POS) and Vue 3 + Electron (XKM); contributed to the cashless (payment) integration.
- Automated testing (Jest, Playwright), hotfixes, code reviews and multi-brand production support; Agile ceremonies.

Head of Electronics, Node.js / Frontend (React) Developer - SpringLabs / Octopy
Feb 2019 - Dec 2022 | Remote
Clients: Bimbo, Nestle, Novo Nordisk, Telefonica, Intel (partner)

- Head of the Electronics area (after the rebrand to Octopy): led a team of 2 people, owning device design, protocols and deliverables.
- Contributed to the project awarded Intel Partner of the Year #1 in AI (Intel Partner Connect, 2020). Reference: https://amiti.org.mx/en/1390/springlabs-se-destaco-como-partner-of-the-year-1-en-inteligencia-artificial-en-el-intel-partner-connect-de-mayo-2020/
- Built internal Node.js chatbots for Telefonica (meetings management, time tracking, employee check-in/out) and management dashboards for Bimbo, Nestle and Novo Nordisk vending robots.
- Developed React web applications, including a real-time UI for an autonomous system (Socket.IO); responsive design and performance optimization.
- Additional role as electronics/mechatronics lead (firmware, PCB, ROS) on the autonomous vending robots.

Earlier Experience - Biomedical Engineering & Electronics

2015 - 2019

- Junior Researcher, CIR "Dr. Hideyo Noguchi" (2017-2019): CAD prototyping, biomedical instrumentation, circuit/PCB design, SMD soldering and additive manufacturing.
- Service Engineer, Biomedical Engineering (2016-2017): preventive/predictive/corrective maintenance of medical equipment and hospital certification protocols (Cancun).

HIGHLIGHTED PROJECTS

- Agenda Inteligente - Full-stack app with React 19 + Vite + TailwindCSS and Express + MongoDB, with OpenAI, Google Gemini and OCR (Tesseract.js). Live app: https://agenda-inteligente-b34e7.web.app/dashboard
- Tech Showcase - Spec-driven monorepo (Next.js, Angular, Vue, Express, Flask, PostgreSQL, SQLite, Docker) with live in-browser demos. Demos: https://showcase-live-seven.vercel.app/ | Source: https://github.com/daniel-fausto/tech-showcase
- Autonomous vending robots (Bimbo) - embedded management dashboard + firmware/control; linked to the Intel Partner of the Year #1 in AI recognition.

EDUCATION

B.Sc. in Biomedical Engineering - Universidad Modelo
2012 - 2016

CERTIFICATIONS

Python, TypeScript, Advanced TypeScript - Platzi, 2022

Database Fundamentals, Node.js, Backend REST API (Express), PostgreSQL - Platzi, 2022

Salesforce Trailblazer - Salesforce, 2023 (https://trailblazer.me/id/dfaustofranco1)

LANGUAGES & SOFT SKILLS

Languages:	Spanish (Native), English (B2), French (Basic/A2)
Soft skills:	Leadership (team of 2), Communication, Self-management, Self-learning, Resilience, Teamwork
